

CAPTAIN'S UPDATE

PREPARING FOR YOUR CRUISE

BULLETIN #1

It's one week before we set sail!

Because this is such a unique experience, and we sincerely hope we never need to do another virtual event again – we want to help ensure you're as ready as possible to make the most of your evening.

This will be the first of a few messages with some tips and tricks to help you get ready.

1) **GET YOUR PASSPORT!**

Is this the email you want to use on Friday night for the event?

If you have a personal address you'd rather use from home, please contact Lisa immediately at lisa@bellevillechamber.ca with your preferred address. We will be sending an "exclusive to you" link to the party. If you can't access it from home, you will be left on shore and we don't want that to happen!

2) Plan to **pick up your Cruise Kit at the Log Cabin on Tuesday or Wednesday (8:00 – 5:00)**

If you are NOT able to come and get the kits for yourself and any of your travelling companions, please let us know so we can arrange a drop off.

3) Find a photo of yourself

It does not have to be large (in fact, less than 512 kb)

It does have to be a .jpg or .png file

Take a quick selfie if you need to... or grab a shot in the sun this weekend!

4) Check out the venue!

Jarrod from eSax is our technical host and has provided a series of videos that will tour you through our "ship" so you can see the many features this venue supports.

We included this link in your confirmation email – but I'll bet you thought you could wait. Now is a good time to check it out [Intro to Remo – aka the BCC President's Cruise Ship](#) – this is just a quick 2 minute video...

This next link shows you how to navigate the ship (pun intended) [Getting Around](#) – it's about 5 minutes long but worth watching a couple of times. It will get you familiar with

the floor plan concept, how you set your profile, and how you can move around so you can see and talk to a variety of people throughout the Aloha reception on the Starboard & Howell decks.

5) Planning for Friday

We hope you've already scheduled this in and we'll remind you again, but the gangplank drops at 5:30 so you can board the ship and start working your way around the "floor". 6:00 the ship sets sail... and that's when things get fun!
